Optimizing Patient Management in EGFR-Mutant Advanced NSCLC

IEO, Leonardo la Pietra Main Conference Room – Bldg 1, groundfloor

LEARNING OBJECTIVES

BY THE END OF THE PRECEPTORSHIP, PARTICIPANTS WILL BE ABLE TO:

- Understand current strategies for early detection, diagnostic work-up, and molecular screening in patients with suspected or confirmed advanced NSCLC
- Describe the biology of EGFR-mutant lung cancer and its implications for risk stratification, treatment selection, and disease management
- Integrate clinical and genomic features into personalized treatment planning for patients with EGFR-mutant advanced NSCLC.
- Discuss the multidisciplinary management of EGFR-mutant metastatic NSCLC, with a focus on systemic treatment strategies and sequencing
- Apply evidence-based decision-making through interactive multidisciplinary case discussions
